Dear colleagues,

On behalf of the Lebanese Society of Medical Oncology, it is my pleasure to invite you to participate in the LSMO 7 National Forum to be held in Lebanon Beirut, November 13-15, 2008, entitled " Commitment to Cure Cancer ".

Controversial and established indications for adjuvant therapy will represent the main topics of the program, as well as unusual subjects such as sarcomas and pancreatic tumors. Eminent international speakers who are experts in the field, are invited to share with us their knowledge and their latest achievements.

LSMO 7 will also follow the tradition by holding a session for clinical trials in Lebanon and the Arab world. So, we are calling for local and regional clinicians and researchers to submit abstracts for selection presentation and awards.

Our radiotherapy colleagues, members of the Lebanese Society of Radiation Oncology, will be holding their second LSRO symposium during LSMO 7. A pathology workshop will also take place under the Lebanese Society of Pathology. Special nursing session will be also organized.

Distinguished colleagues and friends from Lebanon, the Middle East, and the Arab world are cordially invited to attend our outstanding meeting and to express their solidarity towards our fight against cancer.

LSMO President
Joseph Kattan, MD

COMMITTEES

Society Executive committee
Organizing committee :

- Joseph Kattan**
